

PROFILE INFO

I am a highly motivated front-end developer with expertise in the MERN stack and NoSQL. I have already completed several projects, some of which have made a significant impact on daily life. I wouldn't consider myself a beginner, but I'm also not an expert. I have been in this field for more than 2 years and have strong knowledge of React.js and Next.js. I am also an Android developer and have been involved in the crypto sector for more than 4 years.
